

Jun Yan

Department of Statistics
University of Connecticut
215 Glenbrook Rd. U-4120
Storrs, CT 06269

Phone: (860) 486-3416
Fax: (860) 486-4113
Email: jun.yan@uconn.edu
Web: <https://statcomp.org/>

Degrees

Ph.D., 2003, Statistics, University of Wisconsin, Madison, WI
M.A., 1998, Economics, University of Miami, Miami, FL
M.Econ., 1996, Statistics, Renmin University of China, Beijing, China
B.Econ., 1993, Statistics, Renmin University of China, Beijing, China

Research Interests

Social Network, Spatial Extremes, Dynamic Survival Models, Multivariate Dependence, Clustered Data Analysis
Statistical Computing, Biostatistics, Environmental Applications, Public Health Applications, Sports Analytics

Positions

Professor, Department of Statistics, University of Connecticut, 2015–Present.
Affiliated Faculty, The Connecticut Institute for the Brain and Cognitive Sciences, 2023–Present.
Research Fellow, Center for Population Health, University of Connecticut Health Center, 2007–Present.
Associate Professor, Department of Statistics, University of Connecticut, 2010–2015.
Affiliated Faculty, Center for Environmental Sciences and Engineering, University of Connecticut, 2007–Present.
Assistant Professor, Department of Statistics, University of Connecticut, 2007–2010.
Assistant Professor, Department of Statistics and Actuarial Science, The University of Iowa, 2003–2007.
Statistical Consultant, CALS Statistical Consulting Lab, University of Wisconsin–Madison, 2001–2003.

Honors and Awards

Elected Member, 2023, Connecticut Academy of Science and Engineering
Fellow, 2022, Institute of Mathematical Statistics
Fellow, 2017, American Statistical Association
Elected Member, 2014, International Statistical Institute
Outstanding Service Award, 2014, International Chinese Statistical Association

Professional Memberships

American Association for the Advancement of Science (AAAS)
American Geophysical Union (AGU)
American Statistical Association (ASA)
International Chinese Statistical Association (ICSA)
Institute of Mathematical Statistics (IMS)

Services and Outreaches

Editorial

- 2020–present: Editor-in-Chief *Journal of Data Science*.
- 2020–2021: Associate editor, *Brazilian Journal of Probability and Statistics*.

3. 2020: Co-Guest Editor, Special Issue on “Data Science in Action in Response to the Outbreak of COVID-19”, *Journal of Data Science*.
4. 2014–2020: Associate editor, *Ecological and Environmental Statistics*.
5. 2014: Associate editor, *STEM Forums in Statistics*.

Professional Society Services

1. 2025–2027: Chair-Elect/Chair/Past-Chair of the ASA Section on Statistical Learning and Data Science.
2. 2025–2026: Program Chair-Elect/Program Chair of the ASA Section on Text Analysis.
3. 2024–2025: ASA Representative, ACM ASA MAA SIAM Joint Taskforce on Undergraduate Data Science Competencies.
4. 2022–2024: Member, ASA Committee on Data Science and AI
5. 2021–2023: Chair-Elect/Chair/Past-Chair of the ASA Section on Statistical Computing.
6. 2020: Co-Chair, ASA–Journal of Data Science webinar series on “Data Science in Action in Response to the Outbreak of COVID-19”, April 17 — July 24, 2020.
7. 2018–2021: Member, IMS Committee to Select Editors.
8. 2017–2020: Awards Chair, ASA Section on Statistical Computing and Section on Statistical Graphics.
9. 2016–2020, Editor, LIDA Newsletter, The official newsletter of the Lifetime Data Analysis Section, American Statistical Association.
10. 2015–2016: Chair, IT Committee, International Chinese Statistical Association.
11. 2012–2014: Editor-in-Chief, International Chinese Statistical Association Bulletin.

Conference Organization

1. 2025: Co-Chair, Short-course Committee, 2025 ICSA Applied Statistics Symposium.
2. 2024: Co-Chair, International Forum on Data Science 2024.
3. 2024: Lead Organizer, Banff International Research Station Workshop 24w5284: Statistical Aspects of Trustworthy Machine Learning (with Stephanie Hicks, Keegan Korhauer, Xiaotong Shen, and Helen Zhang)
4. 2019–present: Chair, Organizing Committee, Annual UConn Sports Analytics Symposium.
5. 2022: Chair, Organizing Committee, Excellence in Statistical Science: Celebrating the 60th Anniversary of UConn Statistics.
6. 2022: Chair, Steering Committee, ASA Section on Statistical Computing Mini-Symposium: Statistical Computing in Action.
7. 2022: Program Committee, 2023 ICSA Applied Statistics Symposium.
8. 2020: Chair, Organizing Committee, The 3rd International Forum on Statistical Science and Big Data, June 13–15, 2020, School of Statistics, Shanxi University of Finance and Economics.
9. 2019: Chair, Organizing Committee, 33rd New England Statistics Symposium: Statistical Data Science in Action.
10. 2018: Organizing Committee, The 8th International Statistics Forum, Renmin University of China.
11. 2018: Co-Chair, Short-course Committee, 2018 ICSA Applied Statistics Symposium.
12. 2017: Co-Chair, Local Organizing Committee, Conference on Lifetime Data Science: Data Science, Precision Medicine and Risk Analysis with Lifetime Data at University of Connecticut, May 25–27, 2017, Sponsored by the Lifetime Data Analysis Interest Group, American Statistical Association.
13. 2015: Chair, Poster Committee, 2015 ICSA Applied Statistics Symposium

Grant Reviews

1. NSF CAIG panel review, 2024.
2. NSF DMS CDSE-MSS panel review, 2016.
3. NSF DMS Statistics panel review, 2013.

Journal Reviews

1. Annals of Applied Statistics; Annals of Statistics; Applied Stochastic Models in Business and Industry; Bernoulli; Biometrics; Biometrika; Bioscience; Canadian Journal of Statistics; Computational Statistics; Computational Statistics and Data Analysis; Econometrics and Statistics; Environmental and Ecological Statistics; IEEE Transactions on Neural Networks; International Journal of Forecasting; Journal of the American Statistical Association ;Journal of Data Science; Journal of Multivariate Statistics; Journal of Royal Statistical Society Series B; Journal of Royal Statistical Society Series C; Journal of Statistical Software; R Journal; Statistics and Probability Letters; Statistica Sinica; Statistics in Medicine; Stochastic Environmental Research and Risk Assessment; among others.
2. Statistical Reviewer: Journal of Applied Physiology; Advances in Physiology Education.

Departmental Service

1. 2024–2025: Promotion, Tenure, and Reappointment Committee (chair); X + 3 + 1 Admission (chair); Committee; Graduate Examination Committee.
2. 2023–2024: Promotion, Tenure, and Reappointment Committee (chair); X + 3 + 1 Admission (chair); Search Committee for Assistant Professors; Computer Committee; Graduate Examination Committee.
3. 2022–2023: Promotion, Tenure, and Reappointment Committee (chair); 10-Year Strategic Plan Committee (chair); Organizing Committee of the 60th Anniversary Celebration (chair); X + 3 + 1 Admission (chair); Search Committee for Assistant Professors; Computer Committee; Graduate Examination Committee; SET+ Faculty Teaching Evaluations.
4. 2021–2022: Promotion, Tenure, and Reappointment Committee (chair); 10-Year Strategic Plan Committee (chair); Organizing Committee of the 60th Anniversary Celebration (chair); X + 3 + 1 Admission (chair); Search Committee for Assistant Professor in Data Science; Computer Committee; Graduate Examination Committee.
5. 2020–2021: Data Science Program (chair), Computer Committee (chair), Graduate Examination, X + 3 + 1 Admission (Chair), Promotion, Tenure, and Reappointment Committee.
6. 2019–2020: Data Science Program (chair), Computer Committee (chair), Graduate Examination, X + 3 + 1 Admission, Promotion, Tenure, and Reappointment Committee.
7. 2018–2019: Search Committee (chair), Data Science Program (chair), Computer Committee (chair), Graduate Examination, Distinguished Statistician Series, 3 + 1 Admission, Promotion, Tenure, and Reappointment Committee.
8. 2017–2018: Data Science Program (chair), Computer Committee (chair), Graduate Examination, Distinguished Statistician Series, 3 + 1 Admission, Graduate Admission Committee, Promotion, Tenure, and Reappointment Committee.
9. 2016–2017: Computer Committee (chair), Program Review Committee, Graduate Students and Distinguished Alumni Awards Committee, X + 3 + 1 Admission, New England Statistics Symposium (chair), New England Statistics Society, Faculty Search Committee, Graduate Admission Committee, Promotion, Tenure, and Reappointment Committee.
10. 2015–2016: Computer Committee (chair), Admission Committee, Department Head Search Committee, Promotion, Tenure, and Reappointment Committee.
11. 2014–2015: Computer Committee (chair), Admission Committee, New England Statistics Symposium Committee.
12. 2013–2014: Computer Committee (chair), Admission Committee.
13. 2012–2013: Computer Committee (chair), Associate/Full professor search committee, Department's 50th Year Celebration committee, New England Statistics Symposium Committee, Admission Committee.
14. 2011–2012: Computer Committee (chair), Admissions Committee, Biostatistics Search Committee, Department's 50th Year Celebration committee, Biostatistics Program Development Committee.
15. 2010–2011: Colloquium Committee (chair), Library/Tech Reports Committee, Search Committee, Biostatistics Program Development Committee, New England Statistics Symposium Committee.
16. 2008–2010: Library/Tech Reports Committee, Biostatistics Program Development Committee, Social Committee.
17. 2006–2007: Colloquium Committee (chair), M.S. Exam – Minor Committee (chair), Computer Committee.
18. 2005–2006: Colloquium Committee, M.S. Exam – Minor Committee, Search Committee, and Social Committee.
19. 2004–2005: M.S. Exam – Minor Committee, Search Committee, and Social Committee (chair).
20. 2003–2004: Computer Committee, M.S. Exam – Minor Committee, and Social Committee.

Outreaches

1. 2023–present: New York City Open Data Ambassador, working with libraries and community organizations to help bridging data literacy gaps and promoting neighborhood and issue-based dialogue.
2. 2022–present: Instructor of Introduction to Data Science, one-week intensive Pre-College Summer course for high schoolers.
3. 2019–2019: Instructor of Coding for Kids (6–8 years old), Connecticut Chinese Language Academy.

Media Coverage

1. AMStat News (2024): UConn Sports Analytics Symposium Showcases Student-Oriented Educational Innovation
2. UConn Today (2024): UConn Sports Analytics Symposium Showcases the Numbers Behind the Games.
3. UConn Today (2023): UConn Students to Showcase Work at NYC Open Data Week.
4. ASA Member News (2023): Data is My Job.
5. AMStat News (2023): UConn Department of Statistics Celebrates 60th Anniversary.
6. AMStat News (2023): UConn Sports Analytics Symposium Boasts New Features.
7. UConn Today (2022): From Wyoming Mountains to Connecticut Forests, Tracking Feline Apex Predators.
8. Methods Blog (Methods in Ecology and Evolution) (2022): Revealing the hidden lives of cryptic mountain lions using GPS data and a Moving-Resting Motion model.
9. AMStat News (2022): UConn Sports Analytics Symposium a Home Run.
10. UConn Today (2020): UConn Holds Second Annual Sports Analytics Conference.
11. UConn Today (2020): CLAS Faculty and Students Shifting Work to COVID-19.
12. UConn Today (2019): UConn Hosts New Sports Analytics Symposium.

Teaching Experience

University of Connecticut

1. Special topics: Advanced Data Manipulation and Analysis with Python (4185/4188), 1-credit undergraduate level: Fall 2022; Spring 2023; Fall 2023; Spring 2024; Fall 2024
2. Undergraduate Seminar/Investigation of Special Topics: Statistical Writing (3494W/5095): 1-credit graduate/undergraduate statistical literacy requirement; Fall 2022; Fall 2024
3. Introduction to Data Science (5255/3255): 3-credit graduate/undergraduate level; Fall 2021; Spring 2022; Spring 2023; Spring 2024; Fall 2024; Spring 2025.
4. Data Science: One-week intensive Pre-College Summer course for high schoolers; Summer 2021; Summer 2022; Summer 2023.
5. Biostatistics (5625/4625), 3-credit graduate/undergraduate level; Spring 2021.
6. Data Science in Action (6494), 3-credit seminar; Spring 2018 (co-taught with Kun Chen and Elizabeth Schifano); Spring 2019.
7. Statistical Computing (5361), 3-credit graduate level; Spring 2018; Fall 2018; Fall 2020.
8. Applied Statistics II (5605), 3-credit graduate level (required for qualifying exam); Spring 2017.
9. Multivariate Modeling with Copulas (6494), 3-credit graduate level; Fall 2016.
10. Advanced Statistical Computing (6494), 3-credit graduate level; Spring 2014/2015/2016.
11. Applied Longitudinal Data Analysis (6494), 3-credit graduate level; Fall 2014.
12. Mathematical Statistics I/II (5585/5685), 3-credit graduate level sequence (required for qualifying exam); Fall 2011 — Spring 2013, Fall 2007 — Spring 2010, Fall 2015, Fall 2017.
13. Data Analysis Using R (6494), 3-credit graduate level; Spring 2011.
14. Environmental Statistics (6494), 3-credit graduate level; Fall 2010.
15. Statistical Methods (220), 3-credit undergraduate level; Spring 2008.

University of Iowa

1. Probability and Stochastic Processes I (22s:195), Fall 2006.

2. Mathematical Statistics II (22s:154), Spring 2007, Spring 2006, Spring 2004.
3. Mathematical Statistics I (22s:153), Fall 2005, Fall 2004, Fall 2003.
4. Applied Time Series Analysis (22s:156), Spring 2007, Spring 2005.

Students

Ph.D. Thesis Advisees

1. Qingkai Dong, Ph.D. expected 2027 (joint with HaiYing Wang): Subsampling and adaptive design.
2. Shiyong Xiao, Ph.D. expected 2027: Network analytics.
3. Zefang Min, Ph.D. expected 2026: Time series and causal inference.
4. Xiaomin Lu, Ph.D. expected 2026: Survival analysis and causal inference.
5. Sydney Louit, Ph.D. expected 2025: Network analytics.
6. Zhenyu Xu, Ph.D. expected 2025: Cure rate and competing risk.
7. Jun Bruce Jin, Ph.D. 2024 (joint with Kun Chen): On large-scale transfer learning with heterogeneous data. Placement: Faculty Biostatistician, Henry Ford Health.
8. Surya Eada, Ph.D. 2024 (joint with Vladimir Pozdnyakov): Lévy process governed by telegraph signal process: Statistical Inferences and applications. Placement: Assistant Professor of Teaching, Oregon State University.
9. Yingfa Xie, Ph.D. 2024: Recurrent events modeling based on a reflected Brownian motion with application to hypoglycemia. Placement: Postdoc researcher, Yale University.
10. Lucas Godoy, Ph.D. 2024: Hausdorff-Gaussian process with spatial and spatiotemporal applications. Placement: Postdoc researcher, University of California at Santa Cruz.
11. Yelie Yuan, Ph.D. 2023: On assortativity of weighted directed networks. Placement: Consumer and Community Banking Risk Program Associate, JP Morgan.
12. Zehan Yang, Ph.D. 2023 (joint with HaiYing Wang): Optimal subsampling methods for massive survival data using accelerated failure time models. Placement: Mathematical Statistician, US Food and Drug Administration.
13. Jackson Lautier, Ph.D. 2023 (joint with Vladimir Pozdnyakov): Essays on discrete-time survival analysis with applications to securitization and consumer finance. Placement: Assistant Professor, Bentley University.
14. Sai Ma, Ph.D. 2022: Optimal fingerprinting with estimating equations. Placement: Statistician, Vertex Pharmaceuticals.
15. Abby Lau, Ph.D. 2022: Extreme value modeling with errors-in-variables in detection and attribution of changes in climate extremes. Placement: Postdoc researcher, University of Pennsylvania.
16. Yan Li, Ph.D. 2021 (joint with Kun Chen): Amalgamation-based statistical learning for compositional data. Placement: Postdoc researcher, University of Michigan.
17. Jieying Jiao, Ph.D. 2020: On Bayesian methods for spatial point processes. Placement: Senior Consultant, Travelers Insurance.
18. Chaoran Hu, Ph.D. 2020 (joint with Vladimir Pozdnyakov): On Brownian motion governed by telegraph process. Placement: Research Scientist, Eli Lilly and Company.
19. Wenjie Wang, Ph.D. 2019 (joint with Kun Chen): Integrated survival analysis with application to suicide risk. Placement: Research Scientist, Eli Lilly and Company.
20. Yishu Xue, Ph.D. 2019 (joint with Elizabeth Schifano): Diagnostic methods for big survival data. Placement: Senior Consultant, Travelers Insurance.
21. Greg Vaughan, Ph.D. 2017 (joint with Kun Chen): Stagewise generalized estimating equations. Placement: Assistant Professor, Bentley University.
22. Yujing Jiang, Ph.D. 2017: Marginal score equations for spatial extremes with latent signals and applications to fingerprinting changes in climate extremes. Placement: Postdoc researcher, Colorado State University.
23. Brian Bader, Ph.D. 2016: Automated, efficient, and practical extreme value analysis with environmental applications. Placement: Statistician, KPMG.
24. Chun Wang, Ph.D. 2016 (joint with Elizabeth Schifano): Online updating methods for big data streams. Placement: Senior Analyst, Liberty Mutual Insurance.

25. Zhuo Wang, Ph.D. 2015: Estimating equations for spatial extremes with application to detection and attribution analysis of changes in climate extremes. Placement: Assistant Professor, Shenzhen University, China.
26. Hongwei Shang: Ph.D. 2013: A Two-step estimation procedure and a goodness-of-fit test for spatial extremes models. Placement: Statistician, HP Analytic Lab.
27. Sy Han (Steven) Chiou, Ph.D. 2013 (joint with Sangwook Kang): Statistical methods and computing for semiparametric accelerated failure time model with induced smoothing. Placement: Assistant Professor, Department of Mathematics and Statistics, University of Minnesota Duluth.
28. Xiaojing Wang: Ph.D. 2011: Statistical inferences for interval censored data. Placement: Quantitative Analyst, Google New York.
29. Marcos Prates, Ph.D. 2011 (joint with Dipak Dey): Link specification and spatial dependence for generalized linear mixed models. Placement: Assistant Professor, Departamento de Estatística, Universidade Federal de Minas Gerais, Brazil.

Undergraduate Thesis Advisees

1. Mathew Chandy (2024): Nonparametric block bootstrap Kolmogorov–Smirnov goodness-of-fit test. Placement: Ph.D. Student in Statistics, UCLA.
2. Kathleen Houlihan (2024): Selecting team members for the female Artistic Gymnastics Team USA for the Paris Olympics. Placement: Dental School student, Boston University.
3. Shannon Yeung (2023): Varying effects of short term interest rates. Placement: GMI Analyst, BNY Mellon.
4. Owen Fiore (2023): Was Devon Allen unjustly disqualified at the 2022 World Track and Field Championships? Placement: MS Student in Data Science, University of Connecticut.
5. Pranav Tavildar (2023): Sentiment analysis of twitter in relation to fossil fuel stock Prices. Placement: MS Student in Data Analytics, Georgia Institute of Technology.
6. Samuel Hughes (2022): Statistical evaluation of field hockey penalty corners. Placement: MS Student in Data Science, Northeastern University.
7. Anthony Zeimbekakis (2022): On misuses of the Kolmogorov–Smirnov test for one-sample goodness-of-fit. Placement: Analyst Development Program, Electric Insurance Company.
8. Brian Krikorian (2022): Points above replacement: A new NBA metric to evaluate player performance. Placement: Success Metrics Intern, UMass Chan Medical School.
9. Justin Franklin (2021): Comparison of fraud detection methods: A case study with insurance. Placement: Software Engineer, Travelers.
10. Andrew Tammaro (2021): NFL front office analytics with R. Placement: Corporate Strategy and Data Analytics Intern, 1BusinessWorld.
11. Michael Price (2021): The effects of the NBA COVID bubble on the NBA playoffs: A case study for home-court advantage. Placement: MS program in Applied Statistics, University of Delaware.
12. Dylan Barrett (2020): When is the best time to steal bases? Placement: Customer Operations Agent, FanDuel.
13. Taaj Cheema (2020): An analysis of Oliver’s four factors in the golden age of NBA offense. Placement: Data Scientist, IBM.
14. Jack Schooley (2020): Predicting the outcomes of soccer games. Placement: MS Student in Data Science, MIT.
15. Thomas Kennon (2018): Finding an ultimate limit for an NBA player’s shooting percentage. Placement: Data Engineer, The Hartford.
16. Junghi Kim (2010, Joint with Evarist Giné and Nalini Ravishanker): A close look at marginal Cox model and conditional Cox model with application of recurrent gap times. Placement: Ph.D. Student in Biostatistics, University of Minnesota.

Teaching Accomplishments

Student Awards

1. Jackson Lautier (2024): Honorable Mention, Arnold Zellner Thesis Award in Econometrics and Statistics, American Statistical Association.

2. Sydney Louit (2024): Honorable Mention, Student Paper Award, 2024 Applied Statistics Symposium, International Statistical Association.
3. Lucas Godoy (2024): Honorable Mention, Student Paper Award, Section on Statistics and the Environment, American Statistical Association.
4. Yingfa Xie (2024): Student Paper Award, Section on Lifetime Data Science, American Statistical Association.
5. Zehan Yang (2023): Honorable Mention, Student Paper Award, 2023 Applied Statistics Symposium, International Chinese Statistical Association.
6. Yelie Yuan (2023): Honorable Mention, John M. Chambers Statistical Software Award, American Statistical Association.
7. Jackson Lautier (2022): Student Paper Award, Special Conference Celebrating the 60th Anniversary of UConn Department of Statistics.
8. Zehan Yang (2022): Student Paper Award, Section on Lifetime Data Science, American Statistical Association.
9. Jackson Lautier (2022): Student Paper Award, Risk Analysis Section, American Statistical Association.
10. Jun Jin (2022): Honorable Mention, Student Paper Award, Risk Analysis Section, American Statistical Association.
11. Chaoran Hu (2020): Student Paper Award, Statistical Computing and Statistical Graphics Sections, American Statistical Association.
12. Yan Li (2020): ENAR Distinguished Student Paper Award, International Biometric Society.
13. Yan Li (2019): IBM Student Paper Award, 33rd New England Statistics Symposium.
14. Yishu Xue (2019): ENAR Distinguished Student Paper Award, International Biometric Society.
15. Wenjie Wang (2017): IBM Student Paper Award, 31st New England Statistics Symposium.
16. Gregory Vaughan (2017): Student Paper Award, Mental Health Section, American Statistical Association.
17. Steven Chiou (2012): Student Paper Award, Applied Statistics Symposium, International Chinese Statistical Association.
18. Yung-wei Chen (2012): Student Paper Award, Social Statistics, Government Statistics, and Survey Research Methods Sections, American Statistical Association.
19. Xiaojing Wang (2010): IBM Student Paper Award, 24th New England Statistics Symposium.

Teaching Highlights

1. Undergraduate advisees have published journal articles since 2022.
2. Advised the Undergraduate Data Science Club as faculty advisor since 2019.
3. Co-taught “Data Science” to pre-college students in the UConn Pre-College Summer Program since 2020.
4. Developed new courses for the data science program: Statistical Data Science in Action; Introduction to Data Science; Spatiotemporal Statistics.
5. Advised undergraduates in data science in UConn Individualized Major Program.
6. Mentored statistics students to develop software packages in R.
7. Taught students in ecology and evolutionary biology how to do data analysis with R.
8. Taught the first-year graduate required sequence of mathematical statistics effectively.

Grants

External

1. Connecticut Children’s Medical Center, 04/01/2024—03/31/2025: Predictive and Analytical Tools for Decision Making at Connecticut Children’s Medical Center. \$23,228.79. PI: Jun Yan.
2. Servier, 03/11/2024—12/31/2024: AI-Based Adaptive Clinical Trail. \$21,666.67. PI: Jun Yan.
3. NSF DMS2219336, 09/01/2022 — 08/31/2025: Conference: UConn Sports Analytics Symposium: Engaging Students into Data Science. \$49,986. PI: Jun Yan; Co-PIs: Laura Burton, Kun Chen, Robert Huggins, Elizabeth Schifano.

4. NSF DMS2210735: 08/01/2022 — 07/31/2025: Models and Inferences for Heterogeneous Interaction Patterns in Social Networks. \$360,000. PI: Jun Yan; Co-PI: Xianyang Zhang.
5. NSF CC19325716, 08/01/2019 — 07/31/2021: CC* Compute: Shared Computing Infrastructure for Large-scale Science Problems. \$400,000. PI: Richard T. Jones, Co-PIs: Vernon Cormier, Kyungseon Joo, Cara D. Battersby, and Jun Yan.
6. NSF DMS1521730, 2015/09/01 — 2018/8/31: Fingerprint Methods for Detection and Attribution of Changes in Climate Extremes with Spatial Estimating Equations. \$100,000. PI: Jun Yan.
7. NSF DMS1209022, 08/15/2012 — 07/31/2015: Statistical Inferences, Computing, and Applications for Semiparametric Accelerated Failure Time Models. \$130,000. PI: Jun Yan. Co-PI: Sangwook Kang.
8. University of Wisconsin (NIH RO1 subcontract, PI: Hui-Chuan Lai), 09/01/2011 — 08/31/2016: Newborn Screening, Malnutrition and Lung Disease in Children with Cystic Fibrosis. \$37,284. PI: Jun Yan.
9. NASA NNX10AG77G, 06/01/2010 — 05/31/2013: Testing the Suitability of Satellite Precipitation Products for Hydrological Modeling at Multiple Scales across the Blue Nile Basin. \$308,845. PI: Mekonnen Gebremichael; Co-PI Jun Yan.
10. NOAA NA10NWS4680004, 05/01/2010 — 04/30/2012: National Weather Service (NWS) Collaborative Science Technology, and Applied Research (CSTAR) — A New Statistical Model of Streamflow Forecast Error. \$148,574. PI: Mekonnen Gebremichael; Co-PI Jun Yan.
11. NSF DMS0805965, 07/01/2008 — 06/30/2011: Unified Dynamic Modeling of Event Times with Semiparametric Profile Estimating Functions: Theory, Computing, and Applications. \$150,000. PI: Jun Yan.
12. NSF DMS0618883, 07/15/2006 — 07/14/2007: Statistical Computing Research Environments (SCREMS). \$95,000. PI: Mary Kathryn Cowles; Co-PIs: John Geweke, Jian Huang, Luke Tierney, and Jun Yan.

Internal

1. June 2024 – May 2025, The Connecticut Institute for the Brain and Cognitive Science, University of Connecticut — Identifying the association between longitudinal changes in functional connectivity and Alzheimer's disease progression.
2. January 2017 – December 2019, Innovative Education in Science, College of Liberal Arts and Sciences, University of Connecticut — Data Science Lab: Real World Data Science Problems Meet Future Data Scientists (with Kun Chen and Elizabeth Schifano).
3. April 2015 – March 2016, Research Excellence Program, University of Connecticut — Statistical Methods and Computing for Detection and Attribution of Changes in Climate Extremes.
4. January 2011 – May 2011, Multidisciplinary Environmental Research Award, Center for Environmental Sciences and Engineering, University of Connecticut — A Constrained Stochastic Model for Animal Movement Data with Application to Deer Home Range (with Thomas Meyer).
5. January 2010 – December 2010, Faculty Large Grant, University of Connecticut — Semiparametric Methods for Spatial Extremes with Application to Extremal Peak Flow in Connecticut.
6. January 2008 – December 2008, Faculty Large Grant, University of Connecticut — Partly Functional Temporal Process Regression with Semiparametric Profile Estimating Functions: Theory and Application.
7. January 2008 – May 2008, Multidisciplinary Environmental Research Award, Center for Environmental Sciences and Engineering, University of Connecticut — A Hierarchical Spatio-Temporal Model for Terrestrial Snails Abundances in a Tropical Forest (with Michael Willig).
8. July 2006 – June 2007, Mathematical & Physical Sciences Funding Program (MPSFP), University of Iowa — Partly Functional Temporal Process Regression.
9. January 2004 – December 2004, Mathematical & Physical Sciences Funding Program (MPSFP), University of Iowa — Nonparametric Inference for Nonstationary Stochastic Processes.

Papers Submitted to Refereed Journals

1. *Chandy, M., Schifano, E. D., Yan, J., and Zhang, T. (2024): Nonparametric block bootstrap Kolmogorov–Smirnov goodness-of-fit test.
2. *Godoy, L., Prates, M., and Yan, J. (2024): Statistical inferences and predictions for areal data and spatial data fusion with Hausdorff–Gaussian processes.
3. *Loutit, S., Clark, E., Gelbard, A., Vivek, N., Yan, J., and Zhang, P. (2024): CALF-SBM: A covariate-assisted latent factor stochastic block model.
4. Shen, O., Feng, Q., Yan, J., and Zhang, P. (2024): Rank-based assortativity for weighted, directed networks.
5. *Hughes, S., Matthews, G., and Yan, J. (2024): Statistical evaluation of outdoor field hockey penalty corners.
6. *Fiore, O., Schifano, E. D., and Yan, J. (2023): On Devon Allen’s disqualification at the 2022 World Track and Field Championships.
7. *Wang, T., *Xiao, S., and Yan, J. (2023): Comparison of sectoral structures between China and Japan: A network perspective.
8. Chiou, S., Asetline, R., Schilling, E., Lutz, K., and Yan, J. (2022): A bivariate two-part model for censored durations of depression and relational stressor in young adults.
9. *Godoy, L., Prates, M., and Yan, J. (2022): Model-based Voronoi linkage between point-referenced data and areal data in spatial analysis with application to Brazilian election 2018.
10. *Ma, S., Yan, J., and Zhang, X. (2020): Extreme value modeling with generalized Pareto distributions for rounded data.

Software

1. *Bader, B. and Yan, J.: R package `eva` on CRAN, extreme value analysis.
2. *Chiou, S., Kang, S., and Yan, J.: R package `aftgee` on CRAN, multivariate accelerated failure time modeling with generalized estimating equations.
3. *Chiou, S., Wang, X. and Yan, J.: R package `spef` on CRAN, semiparametric estimating functions.
4. Hofert, M., Kojadinovic, I., Mächler, M. and Yan, J.: R package `copula` on CRAN, multivariate dependence with copula.
5. *Hu, C., Pozdnyakov, V., and Yan, J.: R package `coga` on CRAN, convolution of gamma variables.
6. *Hu, C., Yan, J., and Pozdnyakov, V.: R package `smam` on CRAN, statistical modeling of animal movement.
7. *Jiang, Y., Lee, M.-L. T., and Yan, J.: R package `clusrank` on CRAN, rank-based tests for clustered data.
8. Kojadinovic, I. and Yan, J.: R package `fgof` on CRAN, fast goodness-of-fit test.
9. *Li, Y., Chen, K., and Yan, J.: R package `tls` on CRAN, total least squares.
10. *Li, Y., Chen, K., and Yan, J.: R package `dacc` on CRAN, detection and attribution of climate change.
11. *Li, Y., Wang, W., and Yan, J.: R package `touch` on CRAN, tools of utilization and cost in healthcare.
12. *Prates, M. O., Wang, W., and Yan, J.: R package `rbugs` on CRAN, fusing R with OpenBugs.

13. Smith, B. P., Yan, J., and Cowles, M. K.: R package `ramps` on CRAN, reparametrized and marginalized posterior sampling.
14. *Vaughan, G., Chen, K., and Yan, J.: R package `sgee` on CRAN, stagewise generalized estimating equations.
15. *Wang, W., Chen, K., and Yan, J.: R package `intsurv` on CRAN, integrative survival analysis.
16. *Wang, W., Fu, H., and Yan, J.: R package `reda` on CRAN, recurrent event data analysis.
17. *Wang, W. and Yan, J.: R package `splines2` on CRAN, regression spline functions and classes too.
18. *Wang, X., Chen, M.-H., and Yan, J.: R package `dynsurv` on CRAN, dynamic survival modeling.
19. *Xiao, S., Yan, J., and Zhang, P.: R package `fcstat` on GitHub, statistical methods for estimating functional connectivity analysis in brain networks.
20. *Xiao, S., Yan, J., and Zhang, P.: R package `ionet` on CRAN, input-output networks.
21. Yan, J.: R package `tpr` on CRAN, temporal process regression.
22. Yan, J.: R package `som` on CRAN, self-organizing map with application to gene clustering.
23. Yan, J., Højsgaard, S., and Halekoh, U.: R package `geepack` on CRAN, generalized estimating equation package.
24. Yan, J.: R package `KMsurv` on CRAN, datasets and functions for Klein and Moeschberger (1997), “Survival Analysis, Techniques for Censored and Truncated Data”, Springer.
25. *Yuan, Y., Wang, T., Yan, J., and Zhang, P.: R package `wdnet` on CRAN, weighted directed networks.

Invited Talks and Lectures

Invited Talks

1. Statistical Inferences and Predictions for Areal Data and Spatial Data Fusion with Hausdorff–Gaussian Processes, 12/06/2024, Department of Mathematical Sciences, University of Nevada Las Vegas (virtual).
2. Optimal subsampling for semi-parametric accelerated failure time models with massive survival data using a rank-based approach, 08/29/2024, Department of Quantitative Health Sciences, Mayo Clinic (Virtual).
3. Recurrent Events Modeling Based on a Reflected Brownian Motion with Application to Hypoglycemia, 05/23/2024, New England Statistics Symposium 2024.
4. Recurrent Events Modeling Based on a Reflected Brownian Motion with Application to Hypoglycemia, 04/18/2024, Department of Biostatistics, University of Pittsburgh.

5. Optimal Fingerprinting in Climate Change Detection and Attribution with Estimating Equations, 11/20/2023, Department of Statistics, Oregon State University (virtual).
6. Introduction to Survival Analysis, 10/17/2023, Department of Statistics, University of Lagos, Nigeria (Virtual).
7. Recurrent Events Modeling Based on a Reflected Brownian Motion with Application to Hypoglycemia, 03/30/2023, Department of Statistics, Kansas State University (virtual).
8. Optimal Fingerprinting with Estimating-Equations, 08/22/2022, Learning the Earth with Artificial Intelligence and Physics Center, Columbia University.
9. Introductory Overview Lecture: Sports Analytics Beyond Performance Evaluation, 08/08/2022, Joint Statistical Meetings.
10. Optimal Fingerprinting with Bias-Corrected Estimating Equations, 06/11/2022, Special Conference Celebrating the 80th Anniversary of Renmin, Institute of Statistics and Big Data, Renmin University of China (virtual).
11. Recurrent Events Modeling Based on a Reflected Brownian Motion with Application to Hypoglycemia, 05/18/2022, Department of Applied Mathematics, The Hong Kong Polytechnic University (virtual).
12. Recurrent Events Modeling Based on a Reflected Brownian Motion with Application to Hypoglycemia, 03/29/2022, ENAR Spring Meeting (virtual).
13. Optimal Fingerprinting with Bias-Corrected Estimating Equations, 01/31/2022, International Detection and Attribution Group (virtual).
14. Brownian Motion Governed by Telegraph Process in Modeling High-Frequency Financial Series, 08/27/2021, Department of Statistics, Universidade Federal de Minas Gerais (virtual).
15. Correct Working Correlation for Generalized Estimating Equations May Lead to More Bias Under Measurement Error than Working Independence, 06/09/2021, Department of Applied Statistics, Yonsei University (virtual).
16. Moving-Resting Process with Measurement Error in Animal Movement Modeling, 10/26/2020, Center for Statistical Science, Tsinghua University (virtual).
17. An Applied Statistician's Adventure: Climate Change, Animal Movement, Sports Analytics, and Beyond, 05/09/2020, Clubear Lecture (virtual).
18. An Online Updating Approach for Testing the Proportional Hazards Assumption with Streams of Survival Data, 11/29/2019, The 6th Workshop on Survival Analysis and Applications, University of San Paulo, Brazil.
19. Integrative Survival Analysis with Uncertain Event Times in Application to a Suicide Risk Study, 07/05/2019, School of Statistics, Shanxi University of Finance and Economics.
20. Acrobatic Regression in Detection and Attribution of Climate Change, 07/03/2019, Guanghua School of Management, Peking University.
21. An Online Updating Approach for Testing the Proportional Hazards Assumption with Streams of Survival Data, 06/30/2019, School of Mathematics, Jilin University
22. Fingerprinting Changes in Climate Extremes with Joint Modeling of Observations and Climate Model Simulation, 07/30/2018, Vancouver, BC, Canada, Joint Statistical Meetings.
23. Generalized Scale-Change Models for Recurrent Event Processes under Informative Censoring, 07/03/2018, 2018 ICOSA China Conference with the Focus on Data Science, Qingdao, China.
24. Growth Curve Analysis with Shape-restricted Splines, 07/01/2018, International Statistics Forum, Renmin University of China, Beijing, China.
25. Generalized Scale-Change Models for Recurrent Event Processes under Informative Censoring, 06/30/2018, School of Mathematics, Jilin University.
26. Optimal Fingerprinting in Detection and Attribution of Changes in Climate Extremes, 06/26/2018, Center for Statistical Science, Peking University.
27. Statistical Methods for Big Stream Data, 06/19/2018, Shanxi University of Finance and Economics
28. Things about Being a Professor, 12/20/2017, School of Statistics, Renmin University of China.
29. Online Updating Method with New Variables for Big Data Streams, 12/17/2017, School of Statistics, Shanxi University of Finance and Economics.

30. Balancing the Bias-Variance Tradeoff in Extreme Value Analysis, 08/31/2017, Center for Mathematical Research, University of Montréal.
31. Stagewise Generalized Estimating Equations with Grouped Variables, 03/02/2017, Department of Mathematics and Statistics, Boston University.
32. Online Updating Method with New Variables for Big Data Streams, 10/12/2016, Department of Statistics and Biostatistics, Rutgers University.
33. Semiparametric Accelerated Failure Time Modeling for Clustered Failure Times From Stratified Sampling, 07/02/2016, IBS-China 4th International Biostatistics Symposium, Shanghai, China.
34. Spatial estimating equations for detection and attribution of changes in climate extremes, 05/29/2016, China R Conference, Beijing, China.
35. Spatial estimating equations for detection and attribution of changes in climate extremes, 02/02/2016, International Detection and Attribution Group Meeting, Boulder, CO.
36. Spatial estimating equations with application to changes in climate extremes, 10/26/2015, Department of Mathematical Sciences, Worcester Polytechnic Institute.
37. Optimal fingerprinting in detection and attribution of changes in climate extremes with combined score equations, 06/20/2015, Alumni Symposium, School of Statistics, Renmin University of China, Beijing, China.
38. Onset time of chronic pseudomonas aeruginosa infection of cystic fibrosis patients with interval censored data, 06/16/2015, Applied Statistics Symposium, International Chinese Statistical Association, Fort Collins, CO.
39. A bivariate two-part model to assess the effect of coping strategy on stressor and depression, 06/06/2015, Frontiers in Applied and Computational Mathematics 2015, New Jersey Institute of Technology (NJIT) in Newark, New Jersey.
40. Incorporating spatial dependence in regional frequency analysis, 05/25/2014, International Statistics Forum, Renmin University of China, Beijing China.
41. A partial review of software for big data statistics, 02/12/2014, Statistical and Computational Theory and Methodology for Big Data Analysis, Banff International Research Station, Banff, Alberta, Canada.
42. Statistics methods and computing for semiparametric accelerated failure time models with induced smoothing, 05/13/2013, Department of Biostatistics, Brown University.
43. Transformed Gaussian Markov random fields and Spatial Modeling, 11/23/2012, Universidade Federal de Minas Gerais, Brazil.
44. Transformed Gaussian Markov random fields and Spatial Modeling, 10/05/2012, Department of Biostatistics, University of Massachusetts—Amherst.
45. Fast accelerated failure time model for case-cohort data, 06/24/2012, Boston, MA, International Chinese Statistical Association Applied Statistics Symposium.
46. Model selection for Cox models with time-varying coefficients, 04/21/2012, Boston University, New England Statistics Symposium.
47. Max-Stable processes for spatial extremes modeling: A review and some ongoing research, 03/01/2012, Climate Research Division, Environmental Canada.
48. Multivariate accelerated failure time models with generalized estimating equations, 10/04/2011, Biostatistics Research Branch, National Institute of Allergy and Infectious Disease.
49. Augmented estimating equations for semiparametric panel count regression with informative censoring, 03/23/2011, ENAR Spring Meeting.
50. Nonparametric rank-based tests of bivariate extreme-value dependence, 10/27/2010, UMass-UConn Joint Statistics Symposium.
51. Augmented estimating equations for semiparametric panel count regression with informative censoring, 06/30/2010, Yunnan University, International Conference on Statistical Analysis of Complex Data.
52. Nonparametric rank-based tests of bivariate extreme-value dependence, 04/17/2010, Harvard University, 2010 New England Statistics Symposium.
53. Combining data for efficient prediction of the spatial distribution of Iowa residential radon levels, 08/02/2009, Washington, DC, Joint Statistical Meetings.

54. Fast large sample goodness-of-fit test for copulas, 10/02/2008, Département de mathématiques et de statistique, Université Laval.
55. Tests of serial independence for multivariate time series based on a Möbius decomposition of the independence empirical copula process, 06/21/2008, Renmin University of China, International Statistics Forum 2008.
56. Partly functional temporal process regression with semiparametric profile estimating functions, 01/29/2008, Division of Biostatistics, Yale University.
57. Spatial stochastic volatility, 07/12/2006, Beijing, China, Far Eastern Meeting of the Econometrics Society (FEMES) 2006.
58. Partly functional temporal process regression, 06/28/2006, Hong Kong, China, INFORMS International Conference 2006.
59. Spatial stochastic volatility, 04/21/2006, Department of Economics, University of Illinois – Urbana-Champaign.
60. Temporal process regression, 08/10/2004, Toronto, Canada, Joint Statistical Meeting.

Invited Workshops/Shortcourses

1. June 2024, Climate Change Detection and Attribution with Estimating Equations (2-hour short course with Yan Li), 15th International Meeting on Statistical Climatology, Toulouse, France.
2. June 2023, Applied Event Time Data Analysis with R (1-day course with Steven Chiou). 2023 ICSA Applied Statistics Symposium, Ann Arbor, Michigan.
3. May 2022, Applied Event Time Data Analysis with R (1-day course with Steven Chiou). 2022 New England Statistics Symposium, Storrs, CT.
4. July 2016, Advanced Statistical Computing (20-hour course). Shanghai University of Finance and Economics, Shanghai, China.
5. June 2015, Advanced Statistical Computing (20-hour workshop). Shanghai University of Finance and Economics, Shanghai, China.
6. April 2015, Modern Multivariate Statistical Learning: Methods and Applications (1-day short course with Kun Chen). The 29th NESS at University of Connecticut, Storrs, CT.
7. May 2014, Advanced Statistical Computing (32-hour course). Renmin University of China, Beijing China.
8. April 2013, Statistical Analysis of Spatial Data and Visualization with Google Map (1-day short course with Marcos Prates). The 27th NESS at University of Connecticut, Storrs, CT.
9. November 2012, Introduction to the Theory and Practice of Copulas (1-week short course). Universidade Federal de Minas Gerais, Belo Horizonte, Minas Gerais, Brazil.
10. April 2011, Introduction to the Theory and Practice of Copulas (1-day short course with Ivan Kojadinovic). The 25th NESS at University of Connecticut. Storrs, CT.
11. May 2008, Introduction to the Theory and Practice of Copulas (32-hour course). Renmin University of China, Beijing, China.
